# UniverCity

Find more Study better

Target

Our target - university students between 19 and 25 years old

We deployed a form with a series of questions to collect different points of view from our future users.
Data Analysis

Ti piacerebbe avere tutti gli appunti che vuoi in un unico servizio e che questi siano liberamente accessibili?

330 risposte

- Assolutamente si
- Più si che no
- Assolutamente no
- Più no che si
- Non saprei

Data Analysis

Quale strumento usi di solito per studiare?

330 risposte

Needs

- Difficulty in finding notes
- Slow and inefficient research of notes
- Not-homogeneous quality of notes

Possible Solution

...ok really

- Free service
- Good indexing of notes
- Ease on finding notes also from other Universities
- Evaluation system of notes

Main Features

Note Mashup

- Initially manual, will create on request a mashup of the best notes regarding one subject. in future will manually regroup their favourites notes in one file.
- Notes evaluation based on: users rating, # downloads, time spent on the note

Roadmap

- Milestone #2: manual implementation
- Milestone#3: automatic implementation

Main Features

Automatic management of tags

- Documents search based on Tags
- Documents stored according to Tags

Roadmap

- Milestone #2: manual implementation
- Milestone#3: automatic implementation

Main Features

Digital Sign of Notes

- System will mark a posted document with a digital sign that will prevent the storage of copies in the databases.

Roadmap

- Milestone #2: code available

Competitors

	UniverCity	Drive	Mega	DropBox	Moodle	Piazza	Skuola.net	Docsity
Ease in reaching notes	✅	❌ **	❌ **	❌ **	🟠	🟠	🟠	✅
Ordered Notes(******)	✅	❌	❌	❌	🟠 ****	🟠 ****	🟠	✅
Access to notes without signing In	✅	✅	✅	✅	❌	❌	❌	❌
Free notes	✅	✅	✅	✅	🟠 ***	✅	❌	🟠 *****
Unlimited space	✅	🟠 *	🟠 *	🟠 *	🟠	🟠	✅	✅

* it's possible to buy more space

**sometimes to reach a resource it's necessary to receive the authorization from the owner

***it's free, but only students from "La Sapienza" can use it

****sorted by class only

*****alphabetical order of notes

******efficient indexing (tag)

Scenarios

I want to search for notes that I can't find anywhere else, and filter them by University, Faculty, Professor etc. Can I?
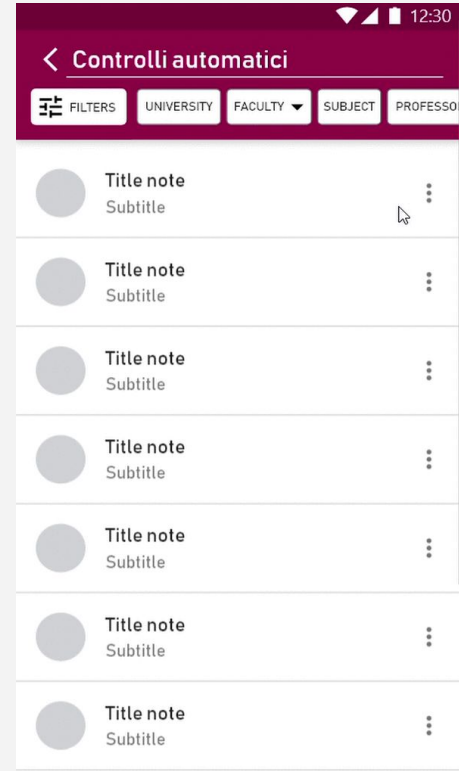

Scenarios

I want to upload some notes saved on my device. I also want to upload a note that I just wrote on paper. How can I do?
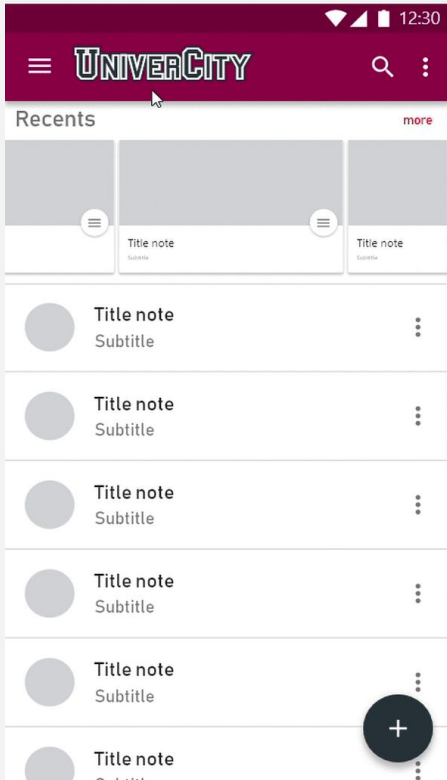

Scenarios

I want to save a note as a favourite and I want to see it anytime without downloading it. Can I?

I just found this note and I want to share it with a friend through a link.   Is it possible?
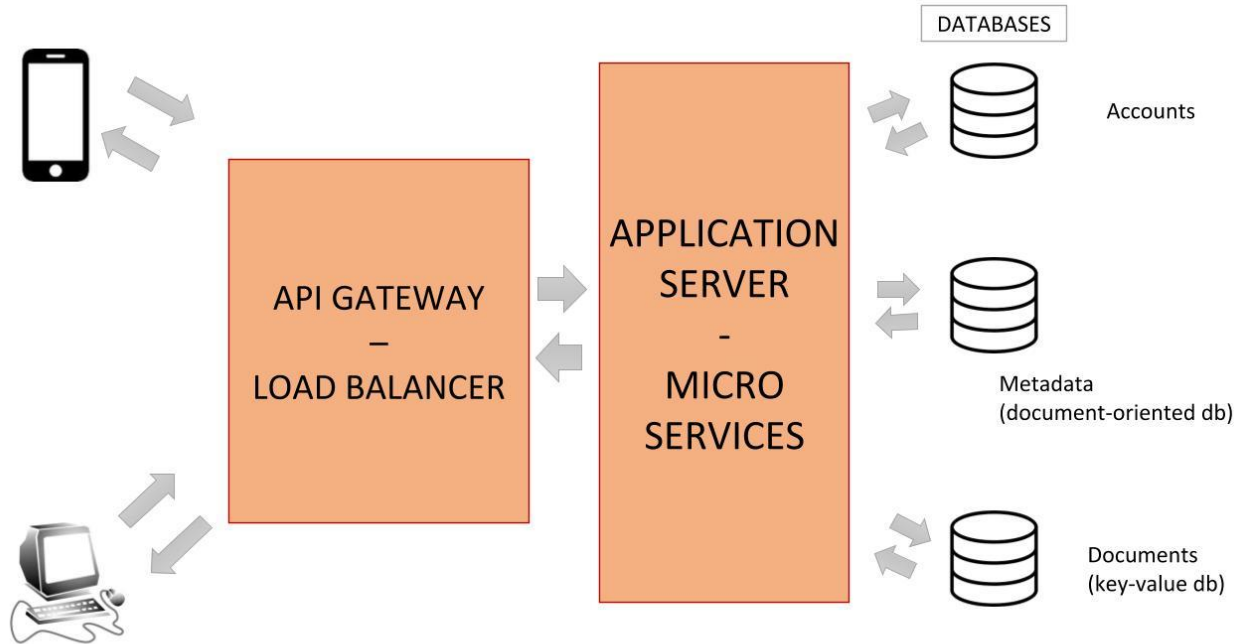

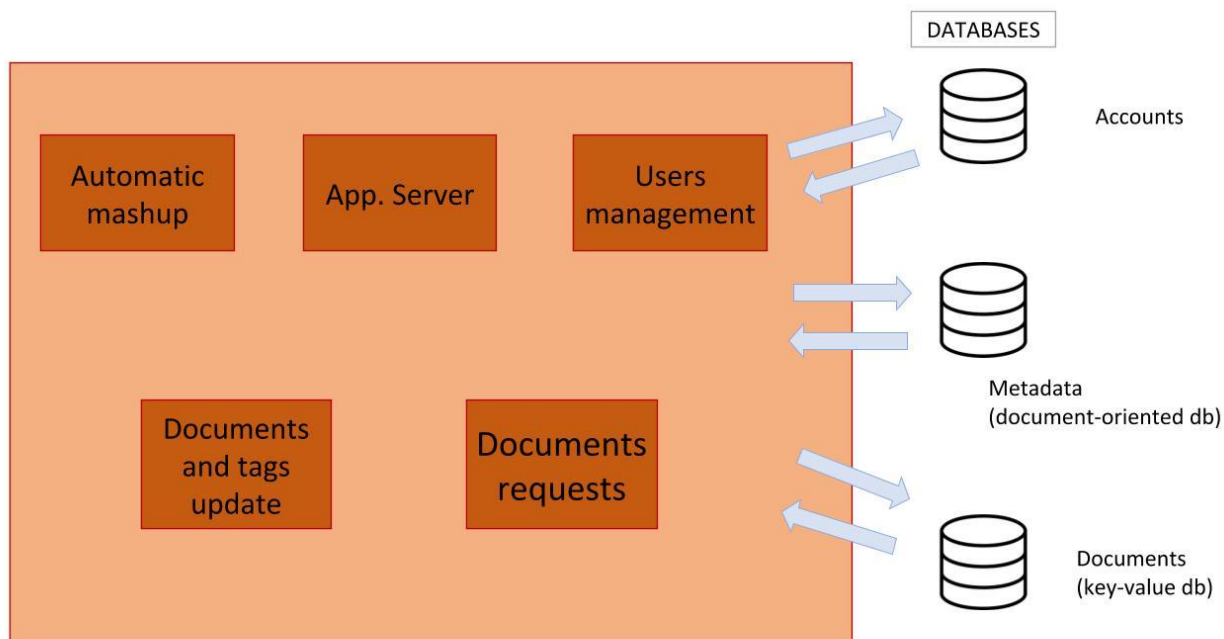

Scenarios

I read a note a few days ago, but I don't remember its name or who wrote it. Can I recover it?

Architecture

- A service that will act as API Gateway, Load Balancer and a proxy Server for environment's security
- We chose a micro services based application servers layer

Architecture

- **App Server:** manage the page request
- **User Management:** sign up and sign in process.
- **Automatic Mashup:** can mashup different notes.
- **Document Request:** return a document on request.
- **Docs and Tag Update:** will update docs and relative metadata, including removal.

Lean canvas (something old and something new)

PROBLEM	SOLUTION	UNIQUE VALUE PROPOSITION	UNFAIR ADVANTAGE	CUSTOMER SEGMENTS
1) Difficulty in finding notes 2) Slow and inefficient research among large data 3) Non-homogeneous quality of notes	1) One tool 2) Automatic tag management 3) Automatic mashup between the best parts of the notes on the same themes	1) Very easy to use 2) Easy to find and share notes 3) Free (as far as possible) 4) Automatic mashup always updated 5) Possibility to see the notes online even without registering, but with restricted privileges	1) Mashup algorithm 2) Algorithm for automated tag management	Primary User: - all university students Secondary User: - university professors

KEY METRICS

1) N. of notes uploaded
2) N. of notes dowloaded

CHANNELS

1) Social network
2) University

EXISTING ALTERNATIVES

1) Studocu
2) Docsity

HIGH-LEVEL CONCEPT

UniverCity = Instagram, but search focused on notes instead of people's images

EARLY ADOPTERS

Some students who need help to find notes to study for a university exam

COST STRUCTURE

Maintenance cost of network architecture

REVENUE STREAMS

1) Donations
2) Sale of data
3) Account premium (maybe)
4) Sponsor (maybe)
